# SSL CERTIFICATES

SSL is the **secure version of Hypertext Transfer Protocol** (or HTTP) at the beginning of your web address

Data encryption essential component for secured internet transaction. SSL provide authentication to protect confidentiality & integrity of website communications with browsers.

Pages that use SSL handle sensitive information, like..

Login pages

Shopping charts

Banking information

When browsing on a http site, your session is encrypted with a digital SSL Certificate

01
ADVANTAGE

The proven standard for website security. SSL certificates ensure e-commerce, communications and private information transmitted between a browser and web servers remain private and secure

name.**domain.com**

name3.**domain.com**

name2.**domain.com**
02
UC MULTI-DOMAIN

UC Multi-Domain SSL certificates **secure multiple domain, sub-domains or hostnames with a single certificate**

MULTI-DOMAIN SSL CERTIFICATES

enable to specify
ALTERNATIVE NAME (SANs)
UP to 9

APPLICATION

MOBILE

03
WILDCARD

Wildcard SSL certificates secure entire domain with a single certificate

wildcard certificate offers the ability to specify up to 9 Subject Alternative Name (SANs) for compatibility with mobile device or application that does not support the wildcard character (*). The customer can add the sub-domain to the SAN field within the same domain name
SECURE

To let users know that a website has an EV Certificate, browsers show more visual cues for sites secured with EV Certificates. EV Certificates include the following visual benefits:

- Green in the address bar (green bar or issuance name, see above)

- Website owner's company name in the address bar

- https:// at the beginning of the domain name

- Padlock in the address bar

- Organization information in the certificate details
