

We Are Hiring

**Be a part of our growing
Pos Digicert Team!**

We're looking for a Mobile Developer to build and maintain Android, iOS, and Huawei applications, working with stakeholders to deliver effective, business-aligned solutions.

Job Position:

Mobile Developer

Full Time / Contract

Roles:

Develop and maintain Android, iOS, and Huawei apps, collaborating with stakeholders to deliver efficient and impactful solutions.

Job Description

- System development for Android Mobile App, iOS Mobile App, Huawei Mobile App, and System Applications.
- Develop software solutions by studying information needs, conferring with URS and SDS, studying system flow, data usage, and work processes, investigating problem areas, and following the software development lifecycle.
- Determine operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions.
- Document and demonstrate solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments, and clear code.

Job Description

- Prepare and install solutions by determining and designing system specifications, standards, and programming.
- Conduct research and development, and implementation work on various app and web applications and technologies.
- Use Git for version control during development and deployment.
- Support and develop colleagues by providing advice, coaching, and educational opportunities (consultation).
- Conduct unit testing on every unit developed.
- Adopt and implement all guidelines, standards, and best practices in routine work.

Requirement / Qualification

- Bachelor's Degree/Post Graduate Diploma/Professional Degree in Computer Science/Information Technology or equivalent.
- Proficiency in React-Native Framework, Ionic, and any cross-platform mobile technology.
- Experience in SQL, Java, and RESTful API Development.
- Strong understanding of Object-Oriented Programming, RESTful APIs, and Push Notifications.
- Willingness to adapt to frequent changes, work in a fast-paced environment, and be innovative and purpose-driven.
- Experience in system, web, and mobile app development.
- Proficient understanding of web markup languages such as HTML5, CSS3, and JavaScript.
- Proficient understanding of CSS preprocessors such as SASS or SCSS.
- Good understanding of client-side scripting and JavaScript frameworks such as jQuery.
- Proficient understanding of version control systems such as GitHub or Git.
- Proficient in cross-browser compatibility and how to handle it.
- Professional certification in a related field is an added advantage.
- Conduct unit testing on every unit developed.
- Adopt and implement all guidelines, standards, and best practices in routine work.
